

Input

1. Soil Health Data
2. Environmental and Climate Factors
3. Zoning and Geographical Data
4. Historical & External Reference Data
5. Farmer-Defined Inputs

Process

1. Data Acquisition & Synchronization
2. Data Preprocessing & Cleaning
3. Data Integration & Contextualization
4. Machine Learning Analysis

Output

1. Soil Health Insights
2. Crop Recommendations
3. Fertilizer Recommendations
4. Performance Metrics and Reports
5. User Interface Outputs
